Doosan Infracore America Forklift sellers successfully operate in over 220 service and sales locations throughout Canada and the U.S. The forklift product line impressively includes 63 distinctive machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous vehicle designs vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift company in the North American marketplace, thanks to their reliability in retaining a high level of client service excellence and optimum product performance to all Doosan Infracore Forklift users. The U.S. lift Truck division based in Cleveland has a skilled team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial domestic lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a nationwide machinery expansion venture. Early sales of this industrial equipment focused on large business groups, the armed services and on state-run corporations. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological improvements combined with sales success placed them in a position of considerable expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the very competitive North American materials handling industry. This project proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company finished construction of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a global sales system and started exporting models they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
