

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Recently retired, after spending numerous years working with his brother to assemble their crane company into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

While on their journey, John spent time talking to previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered an infinite marketplace for a product that could promptly and securely elevate individuals in the air to accomplish maintenance and other construction functions.

After returning from their trip, John set up a joint venture with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design essentials of that original lift into current designs.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the company proudly continues to expand itself into numerous marketplaces globally and develops new products to make sure consumers are capable of being more effective and perform in the workplace within a safer atmosphere.
